

## **Instruction**

### **Student Performances**

The Board recognizes that worthy and appropriate educational values accrue from student participation in civic and community programs when:

1. Such performances fit both the aims of the schools and the needs of the students.
2. Such performances are free from the kinds of appeals and pressures that limit the best development of participants.
3. No student is excluded because of race, religion, color, sex, age, national origin, marital status, or disability.
4. Such performance is appropriate to the age group.

Students may perform where admission fees are charged only if the proceeds are used for charitable, educational, or civic purposes. Payment for performances may be accepted by the school but not by individual teachers or students.

Approval for all public performances may be given by the Office of the Superintendent when the above criteria have been met.
