

## **Community Relations**

### **Community Instruction Resources**

The wealth of educational resources represented by residents and visitors in our school district should be utilized by the professional staff in all appropriate ways, e.g., as consultants, lecturers, demonstrators, laboratory assistants, and as volunteers to assist teachers of various subjects. Such residents or visitors shall not be assigned any disciplinary or instructional duties.

The administration will develop a procedure which will allow for such citizen utilization. All citizen participation in such activities will require approval of the administration.
