Dear Dr. Moore,

Brookwood Middle school subject level teams have work together to create the pacing guides during several of the School Improvement Days and After-School Professional Development days. Teachers collaborated and produce common pacing guides according to the subject level they teach. Math teams worked together, ELA teams worked together, Social Studies teachers worked together, and STEM teachers worked together. We have aligned the completed pacing guides to the common core standards in ELA and Mathematics. Quarters 1-3 are finished and ready for 2015-2016. Time will be needed to complete quarter 4. The Pacing Guides will be a continual work in progress to stay current with educational trends and district and building goals.

To meet the needs of PERA and the Student Growth Model, teachers collaborated by grade level to develop common assessments. A representative from Kids and the Core provided professional development on assessment writing. More time is needed for to collaborate and solidify the completion of the assessments.

Sincerely,

Onquanette Pierce
